

Maxicrop Original Seaweed Extract

Organic

Description

An organic plant growth stimulant ideal for flowers, fruit, vegetables, shrubs and trees. It stimulates natural growth processes, seed germination, plant rooting and establishment. Use early as a root drench or foliar feed spray and later, with fertilisers, to help ensure maximum nutrient uptake.

Directions for Use

Shake well before use.

Dilution rates.

Germinating	10mls to 9 litres	Soak seeds for 12 hours before sowing
Propagating	20mls to 9 litres	Use each time water is needed
Transplanting	20mls to 9 litres	Drench rootball before planting
Growing on	45mls to 9 litres	Apply to roots or foliar feed leaves every 7 days
Mature plants	45mls to 9 litres	Apply to roots or spray leaves every 10-14 days
Fruit crops	45mls to 9 litres	Spray several times before and during flowering to improve fruit set.

Add required amount of water and stir well.

45mls to 9 litres = 1part seaweed extract to 200 parts water

Other information. Wash hands after use. Once mixed use straight away and rinse equipment after use.

Storage. Reseal after use. Store out of reach of children and pets. Store out of direct sunshine, at temperatures between 0 degree centigrade and 30 degrees.
